Employees of Cooper Lighting, LLC, May Be Eligible for Additional Benefits

EUFULA – Current and former employees of Cooper Lighting, LLC, a subsidiary of Eaton Corporation, including on-site leased workers from Staffing Solutions, who were engaged in activities related to the production of lighting fixtures may be eligible for benefits under the federal Trade Adjustment Assistance (TAA) Act of 2011. A petition filed on behalf of workers of Cooper Lighting, LLC in Eufaula was certified by the U.S. Department of Labor on Sept. 20, according to Alabama Department of Labor Commissioner Tom Surtees.

The U. S. Department of Labor found that the workers may have become unemployed as a result of increased imports. The petition covers periods of unemployment occurring on or after Sept. 4, 2012 and before the termination date of Sept. 20, 2015. Under the TAA Act, displaced workers may be eligible for benefits such as training, job search and relocation assistance.

If workers have exhausted their cash benefits under other state and federal unemployment compensation programs, they could be eligible for additional weekly benefits equivalent to the amount they were receiving under other programs. In order to receive Trade Readjustment Allowance (TRA) benefits, workers must be enrolled in training the later of 26 weeks after the certification date or after their last qualifying separation or a waiver of the training requirement must be granted by the state Employment Service Division of the Alabama Department of Labor.

Cooper Lighting, LLC, was also certified for Alternative Trade Adjustment Assistance (ATAA). Employees who are 50 years of age and older, who obtain full-time employment after their separation from the affected employer, may be eligible for allowances under the ATAA program.

Surtees stated that potentially eligible individuals will be notified individually as soon as they are identified.
